

We all know..

How scary any one of the topics on the back of the brochure can be. The Text Pledge project takes many of our nation's epidemics diminishing communities, puts them into 1 smart pledge program for students and individuals. There are 3 very important parts of the project.

The Text Pledge project, helps others see rising percentages, by sharing national statistics on a variety of topics. These statistics are pulled from gov. site monthly.

We also provides all with emergency access help lines: A crisis "smart card" easily accessible from the website or the mobile app. A free resource and service designed to assist in mitigating mental health reform.

Our K-12 programs and books can be viewed on our website and mobile app, used as a tool and resource activity for your classroom.

Presentations include: Talks on Emotional Intelligence, Inclusivity, Diversity, Equality Empathy, Compassion, and as well as many more.

A Proactive Approach

Research shows that it takes the brain 6 times to see something before acting upon it. Wouldn't it be nice if we could help decrease many societal issues that are being seen in this century? And teach our youth at the same time?

Vision

Text Pledge is the first of its kind! A 10 in 1 Smart Pledge, and a program designed for anyone, but most importantly designed with a student in mind.

Engaging youth, schools, churches and nonprofits to raise awareness for issues that are diminishing society. But also, empowering them to make major differences in their own lives, assisting and protecting others, animal rights, our environment, ozone and waters.

Our Objectives

Provide all with emergency access help lines for smart phones that can be used in the event of a crisis.

Provide all with verifiable yearly national statistics. Encourage unity to help heal our damaged communities and assist in mitigating mental health reform.

We encourage everyone to get involved with the Text Pledge project and become an advocate for themselves.
